

Latin-1 Entities

The following table gives the character entity reference, decimal character reference, and hexadecimal character reference for 8-bit characters in the Latin-1 (ISO-8859-1) character set, as well as the rendering of each in your browser. [Glyphs](#) of the characters are available at the [Unicode Consortium](#).

Browser support is generally best for the decimal character references, except for the accented characters (decimal 192-214, 216-246, 248-255), where the character entity references hold a slight edge.

Note that most Mac browsers will render fourteen Latin-1 characters incorrectly. These characters are decimal 166, 178, 179, 185, 188, 189, 190, 208, 215, 221, 222, 240, 253, and 254. See [ISO-8859-1 and the Mac platform](#) for more information.
